# About European Board and College of Obstetrics and Gynecology (EBCOG)

"EBCOG is the Board and College of the Section of Gynaecology and Obstetrics of the Union Européenne des Médecins Spécialistes (UEMS), representing 37 European national societies in Obstetrics and Gynaecology.

The aim of EBCOG is to improve the health of women, as well as unborn and newborn babies, by promoting the highest possible standards of care. EBCOG's core activities focus on education and training, working collaboratively with subspecialties, special interest societies, trainees, and European interest groups to achieve these goals. EBCOG also works closely with the European trainees' organization, ENTOG, to offer fellowships together annually."

## Emirates Institute of Postgraduate Medical Sciences & KnowledgeBridge International's objectives of launching courses with EBCOG

- **Objective:** To address skill development gaps across various domains, including medical, surgical, and self-directed learning.
- **Threefold Goal:** Define which skills should be taught to professionals and postgraduate medical students and establish the best instructional methods, and identify the educational resources needed for clinical and surgical skill development.
- **Skill Classification:** Skills will be categorized into assessment and diagnostic skills, procedural knowledge and manual dexterity, and technical and therapeutic skills.
- **Affiliated Facilities:** Professionals and postgraduate medical students will participate in a five-day course focused on both clinical and surgical skills, with training on essential skills in professional settings equipped with audio, video and equipment on specific procedures throughout.
- **Collaborations and Certification:** Universities, societies, and medical organizations will be invited to send their students and professionals to affiliate skill centers to benefit from these facilities. Upon completing the clinical and surgical skills course, participants will undergo an assessment to qualify for EBCOG certification and DHA accreditation.

## EBCOG Maternal Medicine Diploma - Enhancing Expertise in Maternal and Fetal Healthcare

### Program Overview:

The EBCOG Maternal Medicine Diploma provides rigorous and comprehensive training in maternal medicine, addressing the full spectrum of normal and complicated pregnancies. This program is structured to empower healthcare professionals with advanced skills and knowledge to manage and improve outcomes in both labor and delivery and maternal medical disorders.

### Curriculum Highlights:

#### Labor and Delivery

- **Advanced Delivery Techniques:** Including induction and augmentation of labor, nonstress testing, and epidural analgesia
- **Innovative Tools:** Training on the Odon device, a new tool in obstetrics for safer delivery
- **Special Conditions:** Management strategies for preterm labor, VBAC (vaginal birth after cesarean), and multiple pregnancies
- **Surgical Skills:** Techniques in LSCS (lower segment cesarean section) and operative vaginal delivery using vacuum and forceps

#### Medical Disorders in Pregnancy

- **Comprehensive Patient Care:** From hyperglycemia, anemia, and hypertension to more complex conditions like heart disease, thyroid disorders, and autoimmune disorders in pregnancy
- **Infectious Diseases:** Protocols for managing HIV in pregnancy
- **Neurological and Respiratory Considerations:** Tailored approaches for managing neurological symptoms and respiratory disorders during pregnancy
- **Postpartum Management:** Strategies for dealing with postpartum issues such as puerperal pyrexia and contraception in high-risk patients

#### Special / High-Risk Conditions in Pregnancy

- **Fetal Care:** Addressing fetal growth retardation and conditions like Rhesus isoimmunization
- **Pregnancy Complications:** Management of oligohydramnios, polyhydramnios, and complications from ART

**Nutritional and Metabolic Health:** Tackling obesity and metabolic disorders during pregnancy

**Preventive Health:** Guidelines on vaccines and handling of carcinoma cervix in pregnancy

#### Critical Care in Obstetrics

- **Emergency Management:** Handling of postpartum hemorrhage, placenta previa, and placenta abruption
- **Severe Complications:** Strategies for dealing with uterine rupture, severe infections, and critical care in the obstetric high dependency unit (HDU)

#### Workstations / Hands-on Training

- **Practical Skills Development:** Hands-on training in using outlet forceps, vacuum cups, Odon devices, MVA syringes, IUCD, and compression sutures
- **Real-world Application:** Each session is designed to enhance both the technical and decision-making skills necessary for modern obstetric practice

#### Why Train with us

- **Expert-led Instruction:** Learn from a faculty of renowned specialists and leaders in maternal-fetal medicine
- **Multidisciplinary Approach:** Gain a holistic understanding and practical skills through a curriculum that covers the latest in both theory and practice
- **Career Advancement:** Elevate your professional qualifications and readiness to handle complex cases in maternal medicine

# Diploma Completion Certificate

## Your Pathway to Making a Difference

Join us to not only advance your career through skill development but also to contribute to vital improvements in patient outcomes with comprehensive training and support from our dedicated and popular International and EBCOG faculty. You'll be ready to tackle the challenges and embrace the opportunities for the betterment of outcomes in Maternal Medicine

**ENROLL NOW**

Equips you with expert-level skills, knowledge and also integrates you into a network of professionals who are at the forefront of improving maternal and fetal health outcomes around the world. This format ensures that the material is not only informative but also engaging, helping prospective professionals and postgraduates quickly grasp the depth and breadth of the program offered
