About European Board and College of Obstetrics and Gynecology (EBCOG)

"EBCOG is the Board and College of the Section of Gynaecology and Obstetrics of the Union Européenne des Médecins Spécialistes (UEMS), representing 37 European national societies in Obstetrics and Gynaecology.

The aim of EBCOG is to improve the health of women, as well as unborn and newborn babies, by promoting the highest possible standards of care. EBCOG's core activities focus on education and training, working collaboratively with subspecialties, special interest societies, trainees, and European interest groups to achieve these goals. EBCOG also works closely with the European trainees' organization, ENTOG, to offer fellowships together annually."

Emirates Institute of Postgraduate Medical Sciences & KnowledgeBridge International's objectives of launching courses with EBCOG

» **Objective:** To address skill development gaps across various domains, including medical, surgical, and self-directed learning.

» **Threefold Goal:** Define which skills should be taught to professionals and postgraduate medical students and establish the best instructional methods, and identify the educational resources needed for clinical and surgical skill development.

» **Skill Classification:** Skills will be categorized into assessment and diagnostic skills, procedural knowledge and manual dexterity, and technical and therapeutic skills.

» **Affiliated Facilities:** Professionals and postgraduate medical students will participate in a five-day course focused on both clinical and surgical skills, with training on essential skills in professional settings equipped with audio, video and equipment on specific procedures throughout.

» **Collaborations and Certification:** Universities, societies, and medical organizations will be invited to send their students and professionals to affiliate skill centers to benefit from these facilities. Upon completing the clinical and surgical skills course, participants will undergo an assessment to qualify for EBCOG certification and DHA accreditation.

EBCOG Diploma in Reproductive Endocrinology and Infertility - Unlock the Secrets to Fertility and Beyond

Program Overview:

This Advanced Diploma in Reproductive Endocrinology and Infertility is meticulously designed to provide in-depth knowledge and skills to healthcare professionals specializing in the field of reproductive medicine. From understanding the basic anatomy and physiology to mastering complex fertility treatments, our program covers every aspect essential for a successful career in Reproductive Endocrinology and Infertility.

Weekly Curriculum Breakdown:

Fundamentals of Fertility:

- Explore the basics of infertility, including its definitions, demographics, and epidemiology, alongside a thorough examination of male and female reproductive anatomy and physiology
- Delve into practical assessments for both genders, the impact of the environment on fertility, and strategies for pre-pregnancy counseling and interventions

Diagnosing and Understanding Causes of Infertility:

- Focus on ovulatory disorders such as PCOS and premature ovarian insufficiency and discuss the implications of fibroids and endometriosis on fertility
- Examine tubal factors, infections, uterine factors, and the crucial role of endocrine and genetic assessments in understanding infertility

Treatment Strategies:

- Address non-surgical interventions for both males and females, followed by detailed insights into infertility surgeries
- Cover the protocols for unexplained infertility, the timing and referral for assisted reproductive technology (ART), and the essentials of multidisciplinary team care

Assisted Reproductive Techniques:

- Discuss decision-making processes in infertility treatments and the methods of ovulation induction and intrauterine insemination (IUI)
- Dive into the specifics of IVF and ICSI, including egg collection, embryo transfer, and an overview of IVF laboratory operations

Advanced Topics and Ethical Considerations:

- Explore recurrent miscarriage management, donor therapies, surrogacy, and offspring health post-ART
- Discuss quality management in ART, address risks and complications, and consider the societal and ethical dimensions of oncofertility, social freezing, and reproductive training

Why Train with Us?

- **Expert Faculty:** Learn from global leaders in reproductive medicine, who bring unparalleled expertise and real-world experience into the classroom
- **Hands-On Training:** Gain practical experience through simulations, workshops, and live case studies to prepare for real-world challenges

Diploma Completion Certificate

Your Pathway to Making a Difference

Join us to not only advance your career through skill development but also to contribute to vital improvements in patient outcomes with comprehensive training and support from our dedicated and popular International and EBCOG faculty. You'll be ready to tackle the challenges and embrace the opportunities for the betterment of outcomes in Reproductive Endocrinology and Infertility

ENROLL NOW

Equips you with expert-level skills, knowledge and also integrates you into a network of professionals who are at the forefront of improving maternal and fetal health outcomes around the world. This format ensures that the material is not only informative but also engaging, helping prospective professionals and postgraduates quickly grasp the depth and breadth of the program offered
