# About European Board and College of Obstetrics and Gynecology (EBCOG)

"EBCOG is the Board and College of the Section of Gynaecology and Obstetrics of the Union Européenne des Médecins Spécialistes (UEMS), representing 37 European national societies in Obstetrics and Gynaecology.

The aim of EBCOG is to improve the health of women, as well as unborn and newborn babies, by promoting the highest possible standards of care. EBCOG's core activities focus on education and training, working collaboratively with subspecialties, special interest societies, trainees, and European interest groups to achieve these goals. EBCOG also works closely with the European trainees' organization, ENTOG, to offer fellowships together annually."

## Emirates Institute of Postgraduate Medical Sciences & KnowledgeBridge International's objectives of launching courses with EBCOG

- » **Objective:** To address skill development gaps across various domains, including medical, surgical, and self-directed learning.
- » **Threefold Goal:** Define which skills should be taught to professionals and postgraduate medical students and establish the best instructional methods, and identify the educational resources needed for clinical and surgical skill development.
- » **Skill Classification:** Skills will be categorized into assessment and diagnostic skills, procedural knowledge and manual dexterity, and technical and therapeutic skills.
- » **Affiliated Facilities:** Professionals and postgraduate medical students will participate in a five-day course focused on both clinical and surgical skills, with training on essential skills in professional settings equipped with audio, video and equipment on specific procedures throughout.
- » **Collaborations and Certification:** Universities, societies, and medical organizations will be invited to send their students and professionals to affiliate skill centers to benefit from these facilities. Upon completing the clinical and surgical skills course, participants will undergo an assessment to qualify for EBCOG certification and DHA accreditation.

### Diploma Leads and Faculty

#### Prof. Asma Khalil (Lead)

Consultant Obstetrician and Fetal Medicine Specialist  
St George's Hospital London, United Kingdom  
VP Royal College of Obstetricians and Gynecologists

#### Prof. Sebastian Kwiatkowski

Consultant Obstetrician and Specialist  
Feto Maternal Medicine (Perinatology)  
Pomeranian Medical University, Szczecin, Poland  
Polish Delegate  
European Board of Obstetrics and Gynaecology

#### Prof. Karl Oliver Kagan

Consultant in Fetal Medicine  
Department of Gynaecology and Obstetrics  
University of Tuebingen, Germany

#### Prof. Justin Konje

Professor of Obstetrics and Gynaecology  
Weill Cornell Medicine, Qatar  
Emeritus Professor of Obstetrics and Gynaecology  
University of Leicester, United Kingdom

#### Prof. Ulrich Honemeyer

Associate Professor  
Dubrovnik International University  
Honorary Professor  
Pirogov Russian National Research Medical University, Russia

#### Prof. Samina Dornan

Al Zahra Hospital Dubai  
Consultant Obstetrician and Gynecologist  
Sub-specialist Maternal Fetal Medicine, CCT, United Kingdom

## Format and Duration of the Diploma's

- Diploma will be for 5 days, 9 hours every day, followed by a assessment on day 6.
- Diploma to have 40 high impact lectures with hands on training.
- Diploma to have local and international faculty.
- Diploma to have 50-60 enrolments.
- Diploma will be conducted three times in a year.

## EBCOG Diploma in Fetal Medicine - Empowering Excellence in Prenatal Care

### Program Overview:

Our Diploma in Fetal Medicine provides an exhaustive curriculum designed to advance the skills of healthcare professionals in the realm of prenatal diagnosis and care. This specialized program encompasses theoretical knowledge, practical training, and cutting-edge research in fetal medicine, ensuring our diploma holders are leaders in the field.

### Weekly Curriculum Breakdown:

#### Fundamentals of Ultrasound Imaging

- Physics and technology behind ultrasound and Doppler imaging
- Techniques for early pregnancy assessment and anomaly detection

#### Comprehensive Fetal Assessment

- Sonoembryology covering key organ systems
- Detailed fetal biometry for accurate gestational age and growth estimation

#### Advanced Diagnostic Techniques

- In-depth exploration of fetal brain and facial anomalies
- Specialized sessions on fetal echocardiography and prenatal genetic testing

#### Management of Fetal Conditions

- Strategies for managing intrauterine growth restriction, macrosomia, and fetal tumors
- Insights into placental abnormalities and amniotic fluid assessment

#### Hands-On Procedures

- Training in ultrasound-guided invasive procedures such as amniocentesis and chorionic villus sampling
- Operative fetoscopy and innovative techniques in prenatal therapy

#### Special Topics

- Application of AI in fetal cardiology
- Handling of twin and multiple pregnancies, including complications like Twin-Twin Transfusion Syndrome

#### Global Standards and Practices

- Routine and advanced ultrasound scans following international guidelines
- Accuracy and ethical considerations in prenatal screening and diagnosis

#### Why Train with Us?

- **Expert Faculty:** Learn from leading specialists with global experience
- **Facilities:** Get trained on advance equipments with latest techniques.
- **Career Advancement:** Gain credentials that elevate your professional standing and expertise

# Diploma Completion Certificate

## Your Pathway to Making a Difference

Join us to not only advance your career through skill development but also to contribute to vital improvements in patient outcomes with comprehensive training and support from our dedicated and popular International and EBCOG faculty. You'll be ready to tackle the challenges and embrace the opportunities for the betterment of outcomes in fetal medicine

ENROLL NOW

Equips you with expert-level skills, knowledge and also integrates you into a network of professionals who are at the forefront of improving maternal and fetal health outcomes around the world. This format ensures that the material is not only informative but also engaging, helping prospective professionals and postgraduates quickly grasp the depth and breadth of the program offered
